Maples for Southwest Idaho

Amur Flame Maple (*Acer ginnala* 'Flame')- Small, dense form. Yellowish white fragrant flowers in spring. Red samara. Fiery red fall color. Slow growing. Very cold hardy. Tolerates dry and alkaline soils. Grows well in shade and adapts to containers. Recommended street tree for under utility lines, between streets and sidewalks. Height & Spread 15-20' (zone 2-8)

Autumn Blaze Maple (*Acer x freemanii* cv. 'Jeffersred')-upright oval form. This silver red-cross grows in the higher alkaline soils than rubrums will. It has all the vigor of a silver maple with a slightly smaller leaf, but not the narrow branch angles that cause wind breakage. Its brilliant orange-red fall color is borrowed from the rubrum parents, making this new cultivar one of the best. Height 40-50' Spread 40' (zone 3-7)

Autumn Flame Maple (*Acer rubrum* 'Autumn Flame')- Dense rounded form. Small leaves are a unique feature of this cultivar. Dependable early red fall color. Branches readily as a juvenile tree. Very hardy. Height 40-50' Spread 40' (zone 3-7)

Autumn Radiance Maple (*Acer rubrum* 'Autumn Radiance')- Open rounded form. Best of its October Glory and Red Sunset parents with consistent red coloring throughout the tree two weeks earlier in the fall. Lower branching structure is equally as strong as the terminal, causing a more balanced rounded head. Height 30-60' Spread 40' (zone 4-7)

Columnar Norway Maple (*Acer platanoides* 'Columnare')- Narrow, upright and compact. Dark green, dense foliage. Good as a screen or street tree use where buildings demand a narrow slow tree. Height 40-50' Spread 15-20' (zone 3-7)

Crimson King Maple (*Acer platanoides* 'Crimson King')- Dense, rounded form. Maroon foliage all summer. Yellow flowers. Moderate growth rate, producing dense shade. The most popular of all red-leafed Norways. Full sun. Height 40-50' Spread 35-45' (zone 4-7)

Deborah Maple (*Acer platanoides* 'Deborah')- New foliage is bright red, turning to a vivid dark green. Vigorous grower with a straight central leader. Evenly branched crown. Good for avenues. Form is broadly oval to round. Height 50-60' Spread 40-50' (zone 3-7)

Emerald Lustre Maple (*Acer platanoides* cv. 'pond')- Broad oval form. Deep green glossy leaves. Selected for its vigorous, prolific branching as a young tree. Yellow fall color. Height 60' Spread 50-60' (zone 3-7)

Emerald Queen Maple (*Acer platanoides* 'Emerald Queen')- Dense, broad uniform growth habit. New leaves are light pink turning to dark glossy green foliage. Fast growing. One of the finest Norway cultivars for landscape shade and one of the most widely used. Full sun. Height 50' Spread 40' (zone 3-7)

October Glory Red Maple (*Acer rubrum* 'October Glory')- Dense, rounded form. Medium green, glossy foliage brilliant red in fall. Colors change with weather conditions. Holds leaves late for extended color. A favorite rubrum cultivar due to fall color display. Height 50-60' Spread 40' (zone 4-8)

Paperbark Maple (*Acer griseum*)-upright, oval form. Slow grower. Exquisite cinnamon colored exfoliating bark at a young age. Red fall color. Adaptable to acid or alkaline soil. Needs good drainage. Great for limited spaces and low clearance. Excellent tree with year round interest. Height 20-30" Spread 15-20' (zone 4-8)

Pattern Perfect Maple (*Acer tataricum* 'Pattern Perfect')- Colorful red stems. Thick green leaves and consistent red-orange fall color make this a very useful tree for the yard. Persistent samaras occurring in June are a brilliant red. Moderate growth rate. Handsome small tree, good for residential landscapes. Height 20' Spread 15-20' (zone 3-8)

Red Sunset Maple (*Acer rubrum* cv. 'Franksred')- Brilliant orange-red fall colors. Rapid growing, upright-spreading in youth, developing to a rounded outline at maturity. Height 40-50' Spread 35-40' (zone 4-7)

Sensation Boxelder Maple (*Acer negundo*)-Rounded habit. More controlled and better branching structure than species. Brilliant red fall color. Seedless. Height 60' Spread 35' (zone 2-7)

Superform Maple (*Acer platanoides* 'Superform')- Rapid growing, exceptionally straight and symmetrical. Heavy with dark green leaves. Yellow fall color. Reportedly frost crack resistant. Height 50-55' Spread 40-50' (zone 3-7)
